Profile

Mission. Logotec Language Services is an expert multilingual partner for your communication needs. We facilitate your interaction with customers and clients, providing strategic multilingual communication solutions to support the growth of your business into new markets. We place all of our experience and knowledge at your service to offer customized, powerful integrated solutions that will contribute to the development of your business on an international scale.

History. Logotec Language Services is established in 2001. Thanks to the innovative marketing efforts of the management team and to its quality-oriented services, Logotec Language Services becomes known on an international scale, significantly increasing its income and clientele. Its modern and flexible business model has continued to develop through the hard work and commitment of its qualified team. Our company's motto is quality-targeted services at fair prices.

Team. Our team includes carefully selected professional translators and interpreters, desktop publishing (DTP) experts, and specialized proofreaders with additional studies in engineering, mechanics, IT, electronics, medicine, chemistry, law, finance, banking, and more. These professionals have at least 5 years' experience in their fields and work only in their mother tongue in order to assure accurate work and high quality services. Moreover, Logotec LS has established partnerships with more than 100 worldwide professional language providers in order to attain the highest degree of professionalism and efficiency while adapting to target markets and cultures.

Logistics. We support the quality of our services with state-of-the-art computers (OS: Win XP, Vista Home Premium, Mac OS X), CD-RW and DVD-RW units, external drives and storage media for backups, standard software packages (including dictionaries, MultiTerm glossaries and encyclopedias), laptops, laser printers, scanners, faxes, a large bandwidth ADSL connection with an ISDN option and full internet access 24 hours a day. We use multi-trackware detection tools and an antivirus system, which is constantly updated and fully active for all incoming and outgoing information that we exchange with our clients and collaborators. All information submitted to us is therefore carefully stored, protected, and kept strictly confidential.

Quality Assurance

- **1.** over 10-year tradition, experience and presence on the translation market
- **2.** Use of professional translation resources (CAT tools, hard-copy or CD-ROM specialized dictionaries, online and internal reference materials and glossaries)
- **3.** Use of exclusively native speaker language collaborators with more than 5-years' full-time professional experience
- **4.** Specific database/glossary creation and maintenance for every client
- **5.** General database/glossary creation and maintenance for each field of expertise
- **6.** Terminological consistency and uniformity with each new project for the same client (database updates and adherence to client-specific terminology)
- **7.** Wide offer of single or package services, speed and flexibility
- **8.** Concomitant management of multilingual projects by project managers
- ${\bf 9.}$ Professional second revision by field-specialists in the target languages
- 10. Orientation towards the customer and his needs

Achievements

Thanks to our commitment to quality-oriented services and the dedication of our professional staff, we have succeeded in:

- increasing our sales by more than 20 times as compared to the foundation year
- completing important multilingual projects of more than 3 million words every year, including additional custom-tailored services
- expanding our clientele and external collaborators all over the world, a result of an efficient international marketing policy

Work distribution per field of expertise

Our clients' origin

SERVICES

Focusing on meeting the demands of an increasingly global marketplace, we offer a broad range of language solutions that facilitate international business communications.

Translations

At Logotec Language Services we seek to satisfy all of your translation needs for the most important linguistic combinations in a wide variety of specialist areas. From a simple communicative letter to the complex process of a software localization or a multilingual technical manual, we can provide you with internationalized content structure and multilingual delivery, thanks to our team of professional translators & our extensive network of international collaborators.

Software Localization

Unlike written documentation, localization is a complex process involving the work of more teams (project managers, translators and localization specialists). We can help you to localize your product and maximize your business in the target country. We localize manuals, marketing materials, branding, software interfaces, and websites for specific languages and countries. Only through this process does your product become technically adapted, linguistically precise, culturally appropriate, and easily accessible to target markets.

Proofreading

One of the most important services which assures a consistent and high level of quality in the workflow process is the proofreading of translations. We offer this premium service to all clients who place a higher value on the quality of the final product than on its economic aspects. This service is handled by a large network of highly experienced translators and/or specialized proofreaders with additional studies in other areas such as law, medicine, engineering, informatics, chemistry, physics, and so forth. Finally, we also offer post-edition revisions of the ready-to-print documents, with special attention paid to the final layout and to the special characters of every target language.

Project Management

The Project Manager plays a key role in coordinating the relationship between the translator, proofreader, and client and is responsible for the workflow process preparation. Usually a translator himself, he manages multilingual projects from beginning to end, keeping clients updated on the progression of the project and assuring the completion of the work in accordance with its deadline and quality requirements.

Database Maintenance

With the help of our professional translation tools, we are able to create and maintain comprehensive clientoriented or field-oriented databases as well as terminological glossaries, allowing us to fulfill individual client requests for specific choices of terminology in the target language. This ensures a high quality service with terminological consistency and precision throughout the partnership period, satisfying even the most exigent expectations.

Desktop Publishing (DTP)

The DTP is handled by specialists working in close contact with translators and project managers in order to adapt text and graphics wherever necessary in order to match the requirements of individual languages. We are experienced in text and image processing, desktop publishing, as well as in operating and managing various software in the field. We can manage formats for programs FrameMaker, PageMaker, QuarkXpress, Photoshop, Adobe Acrobat, Interleaf, Visio, Illustrator, and others.

Interpreting Services

Database Maintenance

Logotec Language Services offers simultaneous or consecutive interpreting services for its clients who wish to succeed on an international scale. These services cover official or unofficial corporate meetings, conferences, workshops, vocational training courses, assistance to fairs or trades, and so forth. Our network of fully qualified technical and scientific interpreters covers most European

Language Courses

Our language courses are mostly tailored to suit individual clients using the one-to-one tuition formula, or involve small groups with a limited number of students. Our native speaking tutors are highly qualified to offer language tutoring, focusing on the client's field of work or his general interests in the target language or country. The student's learning interests are stimulated through a pleasant and agreeable approach towards the subject matter with the support of a variety of teaching tools (CDs, course units and language books, audio or video cassettes, etc) combined with grammar, reading, and listening comprehension exercises.

Subtitling

Subtitling is the process of superimposing a written translation on a film that has dialogue in another language. The completed work can be supplied either as an electronic word file or as a text only file. Working with language specialists who provide subtitles in various target languages, Logotec Language Services offers a wide range of target languages to meet your requirements in this field.

Transcriptions

Logotec Language Services offers a fast and reliable transcription service. Working from CD's, audio and videocassettes or electronic audio files, we can provide highly accurate transcriptions of all your audio and video recordings such as speeches, interviews, verbal questionnaires, advertisements, various meetings, and so forth. The completed transcription may be subsequently translated into other languages according to your needs. All transcriptions are completed by native speakers, and they are carefully reviewed and proofread before being delivered to the client.

LANGUAGES

Thanks to our team of professional native speaker translators and interpreters and to our extensive network of worldwide collaborators, we provide a wide range of services into and from the following primary and secondary languages (listed in alphabetical order): **Translations**

"We started our collaboration with Logotec Language Services in 2004 and have continued ever since to require its services for translation and proofreading into the major North, East and West European target languages. Logotec LS has always complied with our specific requirements, providing quality translations with a professional approach of the assigned projects and meeting the tight deadlines that our customers often require. We are very pleased to have Logotec Language Services as our business partner and we highly recommend its services to anyone."

Mr. Nakajima, A. Inc., Japan

"I have been working with Logotec Language Services since the beginning of 2004. The first time I was lucky enough to work with them, they saved me from losing a large US customer. They are very experienced in DTP. I can send them just about any format, and it's not a problem. From a simple PageMaker file to a highly complex Ouicksilver file. I can always be rest assured that our customers will be pleased. Besides English and German into Italian, they have also supplied English into German and French, and I'll know where to go when I need English into Romanian as well.

I know who to call when I need a highquality, on-time and well-formatted translation. They haven't disappointed me once after working with them on numerous occasions, and it's always a pleasure to do business with them."

Ms. V. Graham, ZMC, USA

"One of the most important aspects of our company is to provide translations from Italian into various foreign languages. We select our collaborators not based on territorial proximity but according to their experience, capacity and reliability. We chose Logotec Language Services as our translation and proofreading partner for the legal-administrative field and the Italian - Romanian language combination. Logotec LS has always proven its professionalism, seriousness and capacity of understanding and meeting the specific requirements of the client. The maximum quality of the projects assigned and the prompt observance of the deadlines, even when tight, entitle Logotec LS to be our ideal partner.

For our company the quality of the translations and the client's satisfaction are two essential conditions for our presence on the market. Our collaboration with Logotec LS has always satisfied both conditions and we are very pleased to rely on this company for future collaborations."
